

Intelliworx Platform

- Eliminate the need to use fillable forms for data collection by using Intelligent Interview-flows
- Business rules, form instructions, policies, and compliance are integrated into the Interview-flows
- Interview-flows are adaptive for each user
- Reuse workflows and collected data to create new solutions in the same platform
- Documentation (Policies, Regs) Management
- Integrate with other systems and solutions

Automated data capture

- 
- Data Collection
 - Process workflows
 - Documentation
 - Integrations

Why are we different?

Enterprise level platform – not single instance licenses

Personalized for each user - knows what questions to ask and when

Integrate data collection and forms automation - without interrupting your current business processes

Drag and drop workflows - to create comprehensive solutions

Rapid prototyping - see what you're getting before moving to production

Electronic signatures - applied when rendering forms on-demand

Company Overview

Intelliworx is privately held, established in 2003. Intelliworx brings significant value to your organization by replacing fillable forms with intelligent interview-flows and complex manual processes with simpler automation. This is done in an enterprise level platform, bringing efficiency to your clients and staff.

Forms as a Service (FaaS) Platform

- All your agency forms in a single library
- Unlimited, flexible, adaptive, intelligent interviews in a single platform
- Eliminate forms as your primary method of collecting data
- Automatically map every form field, making them data elements
- Drag and drop to create interview questions using the data elements
- Adaptive Interview-flows can be combined to collect any desired information
- Adaptive interviews provide a personalized customer experience (CX) for each user.
- Collected information can be rendered, on-demand, to an unlimited number of forms....when the forms are required.
- The interview-flows can be integrated into existing business processes or used to create new workflow applications.
- Intelliworx is a multi-tenant, enterprise wide platform. Data and individual workflows can be shared across the agency, virtually eliminating silo applications
- Organizations and sub-organizations have control over their environment; users, roles, permissions, UI/UX, configurability of workflows, and data

Your Agency's Solutions

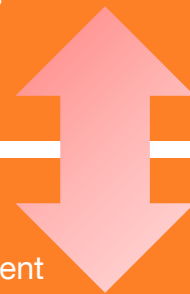

Unique workflow functions:

- Data centric, adaptive, *Interview-flows*
- Personalized Customer Experience
- Dashboards for each user
- Shared data across the agency

Intelliworx Platform

Standard workflow functions:

- Secure PII data collection
- Business process workflow management
- Notifications and reminders
- Multiple system integrations
