

INTELLIWORX®

We Design Intuitive Solutions to
Complex Process Challenges

Key Features and Benefits

Managing business processes without a comprehensive solution in place can be tedious and time-consuming. Solutions using paper forms require the same information multiple times, have complicated instructions, are submitted with incorrect info, and may be missing documentation. Manually managed business processes cause lost time, revenue, and opportunities.

Simplify and streamline your complex business processes with our powerful suite of workflow automation tools. Collect information **once** with intelligent automated interviews. We bake your requirements, compliance rules, and ethics right into the workflow. Automate follow-up with relevant parties. Do everything through an easy-to-use, easy-to-understand dashboard. Your organization's time is important. We can help you make the most of it.

- ▶ Intelliworx creates secure, cloud-based workflow management apps, such as **Financial Disclosure**, **Application Management System**, and **Workforce Management**.
- ▶ We build SaaS platforms in use by the U.S. Federal government. FedRAMP Authorized with 30 Authorizations to Operate (ATOs).
- ▶ Centralize document storage and manage complex business workflow processes from end-to-end.
- ▶ Our unique form mapping capabilities can take an existing document, map it completely, and convert it to data to be used to build intelligent interviews.
- ▶ Intelligent interview workflows are easy to understand for all users and are comprehensive and efficient for Reviewers and Approvers.
- ▶ Mobile-first. 21st Century IDEA and Section 508 compliant. Fully accessible. Simple, seamless, and secure.
