

Innovating the Recruitment Customer Experience

What is Healthcare Workforce Management?

Intelliworx Healthcare Workforce Management (HWM) is a total cloud-based recruiting workflow application developed specifically with small and rural healthcare facilities, and scalability in mind.

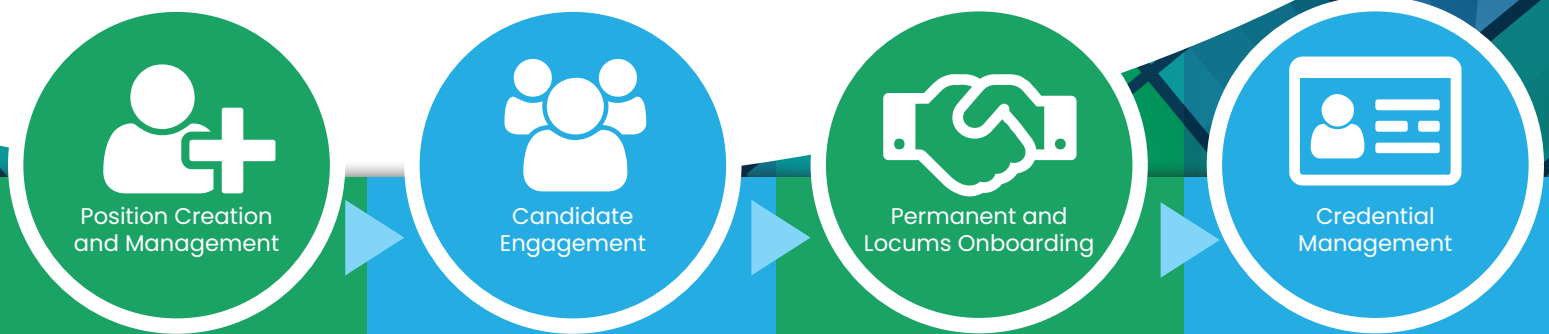

Why use HWM?

Demographics on provider candidates are available earlier in the research process. Together HWM and a large and well-known data aggregator provide an unparalleled customer experience for facilities and candidates.

How HWM Simplifies Recruitment and Onboarding

Managing recruiting, hiring, onboarding, and credentialing requires time, effort, and expense. This process can become more of a challenge without access to a comprehensive solution. HWM is a seamless solution that simplifies communication by keeping all stakeholders engaged throughout the recruitment process using unique dashboards, reporting, and trigger notifications.

HWM helps you seamlessly and efficiently manage candidates through the complete recruiting and onboarding life cycle. Effortlessly communicate between partner platforms for increased cost-savings.
